

Cadmium No Bake®

2023 Touchup Travel Kit

Don't get left on the ground!

SIFCO Applied Surface Concepts (ASC) introduces a new highly portable cadmium touchup kit for small No Bake Cadmium touch-up applications. The kit, specifically designed for the aviation industry, is ideal for AOG operations where repair times are critical. The kit contains the maximum amount of Cadmium solutions allowed for shipment via commercial and private ground carriers.

When aircraft are grounded for critical repairs revenue is at risk. The new touchup kit was designed for those situations where time is of the essence. The SIFCO kit contains everything a trained technician needs to quickly make repairs and get aircraft back into service.

Cadmium No Bake® 2023 Touchup Travel Kit
