

NEW! SIFCO Process Trivalent Chromium Post-Treatment Anodize Seal, Code 5020

29 Apr 2010

News Release

NEW! SIFCO Process Trivalent Chromium Post-Treatment Anodize Seal, Code 5020

SIFCO Applied Surface Concepts, worldwide provider of selective plating products and job shop plating services, and Division of SIFCO Industries, Inc., is proud to announce a new Environmentally Friendly, Trivalent Chromium Post-Treatment Anodize Seal that is an alternative to and a “drop-in” replacement for hexavalent chromium post treatment anodizing seals.

This clear , room temperature seal will allow anodized coatings to pass the 336 hour salt spray requirement of Mil-A-8625.

Now available in 1 liter (pn 80502015), and 4 liter (pn 80502020) containers.

For more information, please contact us at info@sifcoasc.com or call Technical Support at (216)524-0099.
